Integrations Engineer / API Integration Developer

Technology // Engineering // Full Time // Remote

The work of Tovuti starts with our people. Our team is comprised of people who exhibit characteristics that we believe to be unicorns, athletes, and assassins among the masses. This means we get the privilege to work alongside outstanding individuals. The culture that we curate is a direct reflection of the team's health and wellness. We work hard to provide a safe, exciting, and inspiring work environment to move our company forward and advance the skills of our people. Prepare to be challenged and expect to grow alongside an extraordinary group.

Our Mission is to change the world through education. We accomplish this by putting people at the center of our platform and that includes our employees. Our values are centered around **Motivation, Oneness,** being **Young at heart,** and our ability to **Overcome** adversity making us not only a great place to learn but a great place to work.

Moyo is a Swahili word used to describe the heart of one's character; it is an encapsulating term to describe an honorable spirit of moral fiber. To be "**MOYO**" is to be respected and revered in the community. It is the centerpiece of Tovuti's culture. We strive to be Moyo in every way- starting within, and extending this excellence to our families, colleagues, and customers.

The Job

We are looking for an Integrations Engineer or a Software Developer who specializes in writing API integrations to produce high-quality scaleable custom integrations. You will be part of a cross-functional team that's responsible for all engineering aspects of Tovuti. That process follows the software development life cycle, from conception to deployment.

As an Integrations Engineer, you should be comfortable with back-end development languages that handle large consumptions of data, development frameworks, and third-party libraries. You should also be a team player with a knack for design and utility.

The Day-to-Day

- Work with engineering team members and front-facing departments to ensure all business requirements are met
- Design and maintain server-side architecture

- Build custom API integrations that are reusable and efficient.
- Write effective integrations with the intent of testing first.
- Test all code to ensure responsiveness and efficiency
- Troubleshoot, debug and upgrade the current tech stack.
- Write integrations with security and data protection ideologies in place.
- Write technical documentation
- Communicate effectively with all team members to ensure timelines are met and requirements are maintained from start to end.

The Must-Haves

- Proven experience writing and maintaining API integrations
- Data stability and cleanliness
- Familiarity with common stacks (LAMP)
- Familiarity with Agile Methodology
- Knowledge of server-side languages such as PHP.
- Moderate to advanced knowledge of PHP or Object-Oriented programming
    - Integrations will utilize PHP
- Experience working with MySQL databases and web servers
    - (e.g. Apache, Nginx)
- Must know and maintain GIT
- Excellent communication and teamwork skills
- Great attention to detail
- Organizational skills
- An analytical and creative mind
- Be a person who loves technology
- Have a deep passion for connecting with customers
- Never stop learning and growing
- Most importantly, be FEARLESS!

We do train the best and brightest applicants on the job, no prior LMS experience is required.

The Benefits

- Paid Vacation & Holidays
- Section 125 Cafeteria Plan Includes:
    - 401k
    - Medical Insurance
    - Dental Insurance
    - Vision Insurance

- - Flexible Spending Account
  - Supplemental and Dependent Life
  - Accidental Injuries
  - Hospital Indemnity
  - Critical Illness
  - Legal Insurance
  - Credit Monitoring
- Life Insurance Policy
- Employee Assistance Plan
- Pivot Gym Membership
